

ALUMINIUM PLATE AND SHEET HEAVY DUTY ROUTER

*Innovative Technology
At Your Fingertips!*

Winner of the 2008 AMTIL
Advanced Manufacturing
Innovator of the Year Award

International Performance.

Router

- Columbo Spindle, Ceramic Bearings (16 HP Liquid Cooled)
- 10 Tool Rotary Changer
- Unist Coolant Atomiser
- HSK 63 Tool Holders
- Tool-length Sensor Automatic
- Pneumatic Foot
- Brushless Digital Servo
- Tangential Marking
- Rigid Tapping

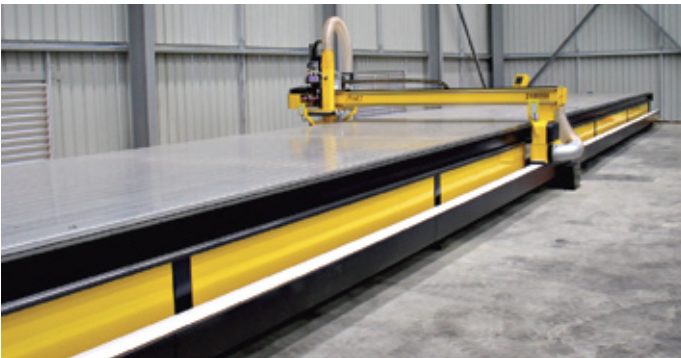

Swarf Transfer System

This does away with overhead ducting, leaving the area clear for material handling & cranes.

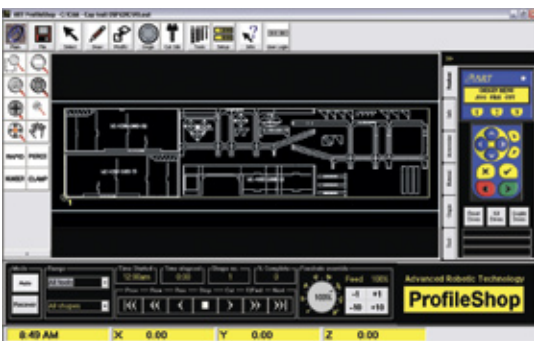

Tooling

ART stocks a large range of collets, tool holders and By-Ray precision tools.

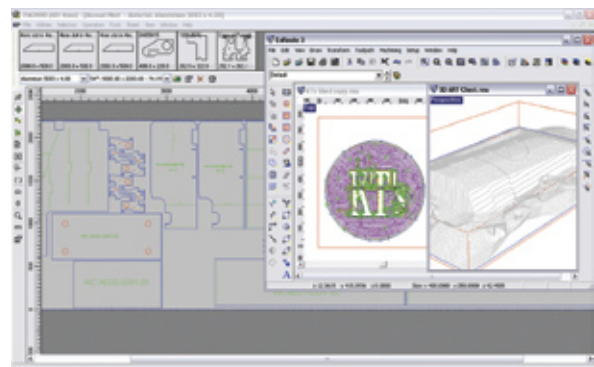

Process Area

From 2500 X 1600 to 20000 x 3000.

Touch Screen

ART Routers have both touch screen & pendant control. This intuitive system provides a quick and simple means of entering machine instructions, editing parts, moving, resizing and more, all at the machine.

Software

Productivity is assured with CAD/CAM software selected to make the most of your machine's capabilities and to suit your production needs. Toolshop, Profile Master and EnRoute, our most popular solutions, offer a multitude of features from True Shape Nesting to Optimize Material usage, Automatic Toolpath Generation, Labeling and Reporting through to 3D Surfacing capabilities. It can be stand-alone or integrated with your existing CAD or MRP software.

* Warranty, 24 months
