

I have much pleasure writing to you and congratulating you on a wonderful CNC machine.

ART installed the Smart 4000 CNC Plasma machine 8 months ago, and it has transformed my business. What would previously take a week to do on outsourced laser, now takes minutes, and design improvements are just a quick change to the program and re-cutting another piece. The Controller program you have written for the machines operation is common sense, simple, and incredibly fast, we love it.

My most often used comment when asked what I think of our ART machine is to say, that I would not be in business today if I had not bought this machine.

Thank you and regards Paul Willett
